PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student and aspiring Full Stack Developer with experience in AI-powered applications, Front-End Development, and responsive web design. Skilled in building scalable web applications, interactive dashboards, chatbot systems, and data visualization solutions through projects like FeedXAI and Serenity. Familiar with AI-based analytics, automation, and user-centric application development, along with Cloud Computing internship experience. Passionate about Artificial Intelligence, modern web technologies, and building innovative solutions to solve real-world problems.

TECHNICAL SKILLS

- **Programming Languages:** Python, C Programming , Java (Basics)
- **fullStack Development:** HTML , CSS , JavaScript, Reactjs, Node JS, python
- **Microsoft Tools :** Excel , Power Point , Word,
- **Prompt Engineer & AI :** ChatGPT , Figma, Lovable & Bolt ,
- **Android Development :** AndroidStudio, AndroidSDK , Git&GITHUB

EDUCATION

HigherSecondaryEducation | 2023
[govt.hr.sec.school, valathur](https://govt.hr.sec.school.valathur)

- Percentage: 76%

Bachelor of Engineering in Computer Science | 2023-2027
[Adhiyamaan College of Engineering , Hosur](#)

- GPA: 8.50 (Upto 5th Semester)

EXPERIENCE

Kaashivinfotech | JUNE 2025

- During my 20-day internship at Kaashiv Infotech, Chennai, I gained practical exposure to cloud computing. Learned cloud architecture, deployment models, and service models like IaaS, PaaS, and SaaS. Performed hands-on sessions on cloud service implementation and management. Explored virtual machines, storage, networking, and basic cloud security. Developed knowledge in resource provisioning and application deployment.

CODTECH IT Solutions | JUNE 2025 - JULY 2025

- During my 4-week online internship at CODTECH IT Solutions Private Limited, I worked in the domain of Cloud Computing. I applied cloud concepts to practical tasks and real-world implementations. I demonstrated strong dedication and technical proficiency in assigned projects. I developed problem-solving skills through innovative project work and active participation. This internship strengthened my knowledge of cloud technologies and professional practices.

PROJECTS

mind care: An AI-Driven Digital Mental Health Support Platform:

GitHub: github.com/akshaya1290/mind-care:

This platform provides an AI-powered digital mental health support system for students in higher education by offering anonymous chatbot assistance, mood tracking, peer support spaces, and self-help wellness resources. It assesses the severity of a student's mental health condition and intelligently routes moderate and severe cases to professional counselors for timely support. The system ensures 24/7 guidance, reduces stigma through anonymity, and promotes continuous mental wellness through interactive engagement and progress tracking, creating a scalable and impactful solution for educational institutions

FeedXAI – AI-Based Course Feedback Analyzer

GitHub: github.com/akshaya1290/feedback-app

Developed an AI-powered course feedback analysis system with dedicated Admin, Student, and Instructor dashboards. Implemented responsive UI, structured feedback collection, and interactive analytics dashboards with charts and reports. Enabled data-driven educational insights through automated feedback analysis and visualization, enhancing user experience and decision-making efficiency.
